

DEVANA PERUPURAYIL

San Diego, CA | (619) 953-7200 | devanaperupurayil@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with 2+ years building production backend services, REST APIs, CI/CD workflows, and data pipelines using Java, Spring Boot, Python, Jenkins, and SQL. Delivered 30+ production services, contributed to service design and code reviews, documented development workflows, and debugged production issues. M.S. in Data Science from UC San Diego with hands-on AI/ML and cloud engineering.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, HTML, CSS, Groovy, Shell

Backend & Web: Spring Boot, FastAPI, REST APIs, HTTP, JSON, Software Architecture

Testing & Development: JUnit, Postman, Unit Testing, Integration Testing, Code Review, Technical Documentation, Jira

Databases & Data: Oracle SQL, Microsoft SQL Server, PostgreSQL, Snowflake, Neo4j, ETL Pipelines

DevOps & Cloud: Jenkins, CI/CD, Git/GitHub, Docker, Kubernetes (UCSD Nautilus), Linux, Microsoft Azure

PROFESSIONAL EXPERIENCE

Associate Software Developer

July 2022 – August 2024

Oracle Financial Services Software Ltd. | Bangalore, India

- Developed 30+ backend banking services and REST APIs on Oracle Banking Architecture (OBA) using Java, Spring Boot, and Oracle SQL, including Stop Payment Enquiry (20% fewer payment errors).
- Validated APIs with Postman, wrote JUnit tests for 8 services (coverage above 80%), reviewed pull requests, and triaged Jira production defects with SQL and logs.
- Built and documented an end-to-end mock service using internal OBA tools; automated Jenkins, shell, and Tomcat deployments across 40+ services; mentored 4 employees and 3 interns on OBA architecture, CI/CD, and troubleshooting.

Data Analyst Intern

August 2025 – June 2026

Made By Gather | New York, NY (Remote from California)

- Automated a scheduled weekly batch forecasting pipeline using Python, Groovy, and Jenkins, reducing runtime from 4 hours to 1 hour; iterated on pipeline and model code that improved forecast accuracy from 47% to 71%.
- Designed Snowflake SQL reporting pipelines from NetSuite workflows and fixed join duplication that inflated sales by more than 2x.

PROJECTS

AI Software Engineering Evaluation Platform

September 2026

Python, FastAPI, PostgreSQL, Docker, Gemini API, Azure, JavaScript

- Built and deployed an AI evaluation platform using FastAPI and Gemini that generates coding solutions, executes them in isolated sandboxes, grades correctness, classifies failures, and benchmarks model performance.
- Designed local/cloud sandbox execution with Docker and Azure Container Instances**, enforcing network isolation, CPU/memory limits, non-root execution, read-only mounts, and timeouts; persisted evaluation history in PostgreSQL.

Motherese: Prosody-Aware Language Modeling with Whisper

April 2025 – June 2025

Python, PyTorch, Kubernetes, YAML jobs, GPU training on UCSD Nautilus

- Built a PyTorch training stack and audio-text pipeline for ~205 hours of speech; ran Kubernetes GPU jobs on Nautilus and improved dependency-parsing F1 by 35% (up to 66% on hard long-range tasks).

Smart Doctor and Hospital Finder

February 2025 – March 2025

Python, PostgreSQL, Neo4j, ETL

- Designed PostgreSQL/Neo4j schemas and Python ETL over 3.2M+ healthcare records, including Dijkstra specialty routing.

EDUCATION

University of California, San Diego, CA

September 2024 – June 2026

Master of Science in Data Science | GPA: 3.89/4.0

Veermata Jijabai Technological Institute (VJTI), Mumbai, India

August 2018 – May 2022

B.Tech. in Electronics and Telecommunications Engineering | CPI: 8.72/10.0
